E-COMMERCE PROPOSAL
Wood Art Interio
April 2025

E-Commerce Transformation

Complete Migration & Modernisation of woodartinterio.com

4,000 SKUs • AI Image Enhancement • Full Automation • Admin Panel

Prepared for	Kuriachan Vazhayil — Wood Art Interio, Manarcadu, Kottayam
Current website	woodartinterio.com
Project type	Full e-commerce migration — new platform, new design, full catalogue
Total SKUs	4,000 products across all furniture categories
Prepared by	Aarpo Global Solutions — aarpo.in
Proposal date	April 2025 — Valid for 15 days

1. Executive Summary

Wood Art Interio has built a strong reputation in Kottayam as a trusted furniture destination. However, the current woodartinterio.com has significant limitations — no e-commerce capability, no product filtering, no online payments, and no automation. Customers cannot browse 4,000 products easily or buy online.

Aarpo Global Solutions proposes a complete platform migration and rebuild — transforming woodartinterio.com into a world-class e-commerce destination with all 4,000 SKUs listed, AI-enhanced product photos, Razorpay checkout, WhatsApp automation, and a powerful admin panel that your team can manage without any technical knowledge.

2. Current Website Limitations

Current Problem	Impact on Your Business
No e-commerce or checkout	Customers cannot buy online — you lose sales every day
No product filtering	4,000 products with no way to search or filter — customers leave
Old product photos	Poor quality images reduce trust and perceived value of furniture
No WhatsApp integration	Enquiries are missed — no instant alerts to your team

No admin panel	Every small update requires calling a developer
No SEO optimisation	woodartinterio.com does not rank for Kerala furniture searches
No mobile optimisation	80% of Kerala buyers browse on phones — poor experience loses them

3. Migration Plan — What We Need From You

A successful migration requires specific information and assets from Wood Art Interio. Below is the complete checklist of what we need before we begin building.

3.1 Access & Credentials

What we need	Why we need it	Format
Current website login (admin access)	To export existing content and product data	Username + Password
Domain registrar login (where woodartinterio.com is registered)	To point domain to new website after launch	Login credentials
Current hosting login (cPanel or provider)	To manage DNS and email during migration	Login credentials
Google Analytics access (if set up)	To preserve existing traffic data	Google account access

3.2 Product Data

What we need	Why we need it	Format
Product names for all 4,000 SKUs	To create individual product listings	Excel or CSV
Product categories (Bedroom, Living, Dining, etc.)	To build the filtering system	Excel or CSV
Product prices and any offer prices	To display correct pricing with discounts	Excel or CSV
Product dimensions and materials	To display specifications on each product page	Excel or CSV
All existing product photos	To process through AI enhancement tool	Google Drive folder or USB
Brand logo in high resolution	For website header, footer, and favicon	PNG or SVG file
Brand colours (if defined)	To match new website to your brand identity	Hex codes or reference

3.3 Business Information

What we need	Why we need it	Format
Showroom address and Google Maps link	For contact page and local SEO	Text
Business phone numbers and email	For contact page and WhatsApp integration	Text
Business working hours	For contact page and AI chat responses	Text
Razorpay account (or we help create one)	To accept online payments via UPI, cards, EMI	Account access
WhatsApp Business number	For automation and instant enquiry alerts	Phone number
3–5 sentences about Wood Art Interio history	For About page and SEO content	Text or voice note

4. What the New Website Will Deliver

Feature	What it means for Wood Art Interio
Full e-commerce with Razorpay	Customers can buy online via UPI, debit/credit cards, and 0% EMI
4,000 SKU product catalogue	Every product listed with photo, price, specs, and category filters
AI-enhanced product photos	All existing photos processed to look premium — clean backgrounds, better lighting
Advanced search and filters	Filter by room type, material, price range, and availability instantly
Individual product pages	Each product has its own page with gallery, dimensions, warranty, and EMI info
Admin panel	Add products, manage orders, track leads, create offers — no technical knowledge needed
WhatsApp alerts	Every order and enquiry sends an instant WhatsApp to your team
6 automation workflows	Order confirmations, inventory alerts, review requests, weekly reports — all automatic
Offer Zone with countdown timers	Create limited-time deals that create urgency and drive purchases
Google SEO optimisation	Ranks for “furniture shop Kottayam” and “best furniture Kerala” searches
AI chat widget (Zia)	Answers product queries and captures leads after business hours automatically

Mobile-first design	Perfect experience on every smartphone — where 80% of your customers browse

5. AI Image Enhancement — 4,000 Product Photos

Your existing product photos will be processed through a professional AI enhancement system. This is a dedicated phase of the project handled by Aarpo before any products go live on the new website.

Enhancement	What changes
Background removal	Distracting backgrounds replaced with clean white or warm neutral tones
Lighting correction	Dark or yellow-tinted photos corrected to show true product colours
Sharpness enhancement	Blurry or low-resolution photos improved for crisp product details
Consistent sizing	All 4,000 photos standardised to the same dimensions for a uniform catalogue look
Batch processing	All photos processed together — not one by one — using professional AI tools

Note: For photos that are too dark or too low resolution to enhance, we will flag them for reshoot before upload. We recommend reshoooting a maximum of 200–300 priority products if budget allows.

6. Technology Stack

7. Investment

This proposal covers a complete platform migration, full e-commerce build, AI image enhancement for 4,000 products, 6 automation workflows, and 3 months post-launch support.

Component	Investment
Premium e-commerce website build (Next.js, Supabase, Razorpay, Admin Panel)	**₹75,000**
4,000 SKU data migration, upload, and catalogue setup	**₹30,000**
AI image enhancement for all existing product photos	**₹20,000**
6 n8n automation workflows + WhatsApp alerts + Zoho Zia chat	**included=>"Included"**
3 months post-launch support and maintenance	**included=>"Included"**
Total Project Investment	**₹1,25,000**

8. Payment Milestones

Milestone	Percentage	Amount
On Signing Agreement — Advance to begin	**40%**	**₹50,000**
After Design Approval — End of Week 2	**30%**	**₹37,500**
After Development Complete — Week 8	**20%**	**₹25,000**
On Final Launch — Week 10–12	**10%**	**₹12,500**
Total	**100%**	**₹1,25,000**

9. Project Timeline — 12 Weeks

Phase	Duration	Work done	Deliverable
Phase 1	Week 1	Discovery, content & data gathering, migration checklist	Sitemap + data handover checklist
Phase 2	Week 2	Full UI design — homepage, product, category, admin pages	Design approved by client
Phase 3	Weeks 3–4	Next.js build, Supabase setup, Razorpay, admin panel	Staging website live
Phase 4	Weeks 5–6	AI image enhancement for all 4,000 product photos	Enhanced photos ready for upload
Phase 5	Weeks 7–8	Product data upload — all 4,000 SKUs with photos	Full catalogue live on staging
Phase 6	Week 9	n8n automations, WhatsApp alerts, Zia chat widget	All 6 automations tested
Phase 7	Weeks 10–12	Final QA, SEO setup, domain migration, go live	woodartinterio.com fully live

10. Key Terms

10.1 Project begins only after receipt of 40% advance payment and signed agreement.

10.2 Client agrees to provide all migration assets listed in Section 3 within 5 days of project start.

10.3 Two rounds of design revisions included. Additional revisions charged at ₹2,000 per round.

10.4 Razorpay account setup, WhatsApp Business API costs, and domain renewal are not included and are borne by the client.

10.5 Product data upload is based on data provided in Excel or CSV format. Data cleaning or manual entry of missing product information will be charged separately at ₹500 per 100 products.

10.6 Post-launch support of 3 months covers bug fixes and minor updates. New features require a separate agreement.

10.7 This proposal is valid for 15 days from April 2025.
